**SOCIALLY SPEAKING™ : A PRACTICAL SOCIAL SKILLS
CURRICULUM FOR SERVICE PROVIDERS**

For Young Children With Autism and Special Needs

Inappropriate social behaviors serve a purpose for the child and that purpose needs to be explored. This workshop will teach you to explore the purpose of the inappropriate behavior and recognize behavioral triggers. Attendees will learn to shift from a crisis intervention paradigm to one that methodically improves the child's self-regulation and communication through body awareness and orientation to person/place/time. In addition this training will address developing communication for social skills such as expressing feelings and understanding and using humor.

Presented by:
